## Virtual-class Rooms

The Aims VI uses a combination of video lectures, reading material, audio/video tutorials and on-line interaction

(E-class rooms) for imparting knowledge. However, it follows a very formal assessment and evaluation system in the same fashion as used in any conventional higher education institution (HEI).

More than 15 campuses of the Aims across Pakistan provide its students a great opportunity to participate in academic activities, Although, the Aims observes the semester system, its students have complete flexibility to study at their own convenience, pace and place.

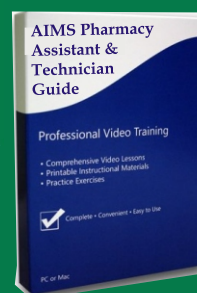

More than 15 campuses of the Aims across Pakistan provide its students a great opportunity to participate in academic activities without any extra burden on their pockets as compared with those studying at home. The wide spread of Institute campuses and complete flexibility to study at home jointly support the unique idea of “World Class Education at Your Doorstep” and in a true sense makes it unnecessary for students to relocate or travel to larger cities to obtain higher education.

### Complete student-teacher interaction and support is provided through the AIMS - LMS

Complete student-teacher interaction and support is provided through the AIMS-LMS while semester examinations are conducted in a formal, proctored environment at designated examination centers throughout the country.

## Video Lectures

The Aims's video lectures are developed by highly qualified faculty members or field experts in a complete digital environment and handcrafted at its own fully equipped recording studios. These lectures are then delivered through Aims's Learning Management System. The students can watch these video lectures at their own convenience, however the Aims suggests a “Time Plan” for guidance and better time management for studies during the semester. Students may also obtain the video lectures on DVDs from the Aims's online bookshop.

## The Learning Management System (LMS)

The Aims Learning Management System is a comprehensive software platform that allows students to manage their educational experience while studying at the Aims. The AIMS-LMS allows you to:

- Maintain and update your personal information
- Receive important announcements from the Aims
- Maintain a personal diary and notes
- View your lecture schedule
- Read lecture notes
- Download assignments and submit your solutions for grading
- Ask questions from your tutors and receive replies to the same
- Participate in quizzes and class discussions
- View your results and monitor your academic progress through your grade book
- View your fee status and download your fee vouchers for payment at the bank
- Access a host of student services such as requesting for lost Id Cards etc.

You will learn more about all of the above in the orientation video that is available on this link. [www.alliedinstitutes.edu.pk](http://www.alliedinstitutes.edu.pk)

## How to ask Questions

The facility of the MDB (Moderated Discussion Board) has been provided to ask questions relevant to lessons. The recommended procedure is to

- Read handouts prior to taking video lecture
- View the video lecture and prepare key notes
- Read the relevant page/section of the handout/ recommended books and visit the internet links as mentioned in the course calendar
- Discuss and share ideas on the discussion board
- Ask questions on the discussion board.

After logging on to the LMS, first check the FAQs for the course to see if your queries have been addressed in any previous semester. If not, go to the open MDB for the course (only one session will be “open”; other sessions will be readable but you may post questions only on the “open” board) and post your question. Tutors will respond to your queries within a short period of time. You are also encouraged to read questions from other students and the tutors' responses to them. This will improve your understanding of the subject matter. Remember, the MDB are always readable throughout the semester so they form a very valuable asset when you are preparing for semester examinations.

## AIMS MEDICAL COLLEGE

### OUR GOALS & ACHIEVEMENTS
